Please see below communications and three (3) folders of images to follow.

Please feel free to reach out with any question or as mentioned...please point me in any direction for guidance, support, or assistance with ending the chaos!

Thank you for representing our state and everything you do!

Subject: Child Wellbeing Support Needed

Good morning Nicole,

- I'm re-sending the communication below from last Friday due to the size of files (images) exceeding the maximum limit.
- I've attached the email chains above.

I will follow up with three (3) additional electronic messages containing the images.

Each zip folder is labeled by month.

February
March
April

I will also add that I received a call on Friday 4/25/25 @ 4:31p.m. from a "private number"

Sergeant Joe from the Lemont Police Department called and said he was "just assigned to this case by his Chief".

But "has no exposure to the complaint or what has been documented".

This seems to be a reoccurring "resolution"

Kick the can and play dumb.

I will send Joe the same info I've sent you regarding communications and images.

Thank you so very much again!

If you were in receipt of my email last Friday and took action:

It may have almost immediately produced some correspondence from within my village after weeks of silence and months of suffering!!

Good afternoon Nicole,

I hope you have been well.

- I appreciate the phone call from your office after my original inquiry around a month ago.
- Has there been any update provided to your organization?
- The situation is still on going up to and including last night through this morning.

I've included two (2) pdf email threads dating to the beginning of this year.

My original thread was abandoned once Village personnel added their attorney (Mike Stillman) to the one titled "Trailer Parking (No Tractor)"

The current one is quite long but shows clear communication to numerous Village of the Lemont authorities and Gas'N'Wash representatives.

I've also attached a zip folder that has 96 images dating from 2/9/25 through 4/18/25.

These timestamped images correspond to notifications sent to the Village of Lemont regarding excessive idling of semi-trucks.

Each and every image has been sent to the Village.

I have been extremely patient while literally worried sick about our young children, community, and the environment.

If there are other state representatives you think can help us:

I pray that you please provide me with their contact information or please feel free to give them mine.

Thank you in advance for any continued support or referrals to ensure our children can again have a safe place to live, play, sleep, and call home.

Good afternoon Nicole,

- As the 82nd district representative, I'm praying you can assist, or point me in the right direction, to rectify an ongoing issue we're having at our residence.

Diesel semi-trucks excessively idling.

Here's an example of what I continuously send to the Village of Lemont governing directors and key stake holders along with timestamped images:

"Good afternoon all,

- **Can someone please provide me with any update on eliminating my family from continuously being exposed to toxic exhaust emissions and the loud obnoxious noise trespassing from excessive idling of trucks illegally parked at Gas'N'Wash (GNW)??**
- **Has there been any progress on implementing and enforcing Ord. O-30-24?**

Including the conditions requiring approved signage indicating:

- No idling
- Maximum parking hours
- No overnight parking

Per Jason Berry and village attorney Mike Stillman:

- This signage was required to be installed prior to the completion/certificate of occupancy for the large vehicle parking lot.

The gate is installed and appears to be 100% operational, but it's still open every evening - transmitting to overnight parking/idling of trucks **every single night** - as seen in attachments from last night, this morning, along with every previous emails including timestamped images!

- Illegally parked and illegally idling in the lot that is supposed to be closed at night for **+11 hours!!**
3/27/25 @ 7:04p.m. through 3/28/25 @ 6:20a.m.

- Also attached images of Illegally parked and illegally idling trucks for **12 hours!!**
3/25/25 @ 5:46p.m. through 3/26/25 @ 6:37a.m.
3/26/25 @ 6:42p.m. through 3/27/25 @ 6:32a.m.

Directly across the street (approx. 150 ft.) from our residence and bedroom windows.

This is occurring every day and every night!

**I captured timestamped images on 3/24/25 showing "American Express Freight" using the GNW parking lot as a hub for distribution!
Dropping trailers and also swapping them with other diesel tractors idling in the lot.**

Listed below are dates/times Gas'N'Wash, Village of Lemont, and I have phone records of excessive idling concerns reported dating back to at least as followed.

- Thursday December 12th, 2024 @ 7:26p.m. – Lemont, non-emergency police
- Friday December 13th, 2024 @ 6:46a.m. – Lemont, Gas'N'Wash
- Tuesday December 17th, 2024 @ 5:04p.m. – Corporate, Gas'N'Wash, (855) 476-9274, number provided by Gas'N'Wash Lemont manager on duty @ 4:59p.m. 12/17/24.

I spoke with Lemont police sergeant on Friday 01/24/25 at 5:05 A.M. to file an odor complaint through Lemont's OAN (Odor Alert Network)

[Odor Alert Network | Village of Lemont, IL](#) <-----LINK

- **This was after calling Lemont non-emergency police and them refusing to do anything.**
- **I still have not received a response, but Sargent referenced Case #2025007646
Stating to me "this has been an ongoing issue"
Is there literally any progress to report on the nuisance odor complaint filed on 01/24/25?**

Should I continue to call the village non-emergency police department and file daily odor complaints?

- Please someone let me know:
- **What can I personally be doing besides documenting this and relaying the information to all relevant parties?**

To no longer suffer anymore sleepless nights from excessive noise pollution.

To eliminate the mental anguish knowing our two (2) young children + newborn infant are in danger and continuously being exposed well beyond the PEL (personal exposure limit) standards for benzene.

A CLASSIFIED KNOWN HUMAN CARCINOGEN by EPA, IARC, ACS, etc.

- **In 1948 the American Petroleum Institute (API) stated that "the only absolutely safe concentration for benzene is zero"**

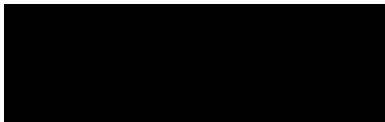

The #1 most effective way to hazard removal is elimination.

Why is nothing being done to eliminate the hazard and restore the air quality inside our personal dwelling?

The village of Lemont, cook county, and state of Illinois continues to be contaminated by these trucks without just cause!

If anyone has questions or would like additional images since my last communication on Monday 3/24/25, I will provide them.

As most all of you have been informed, this has been going on daily for months!

I've been notifying multiple parties within our village (Lemont) the Illinois EPA, cook county environment and sustainability, etc.

There has been absolutely no sign of improvement or the village police department enforcing,
[Illinois General Assembly - Illinois Compiled Statutes](#)
[Illinois General Assembly - Illinois Compiled Statutes](#)

- I encourage you to also view my public comment as time permits, submitted last Friday for the CASE # R2024-017PC
" Proposed clean car and truck standards"
[Document-113313](#) <-----Link to my personal comment
- If you can be of any additional assistance to myself, family, community, or the environment to leverage an end of diesel semi-trucks idling all night long directly outside our property please feel free to reach out!

Also, please pass this along to anyone else whom you think may be able to help!

Though my public comment for the case # does contain some of the background, there is much more as I've been documenting this horrific nightmare as myself and family are physically living through it!

Thank you again for your time representing the 82nd district and any support you can provide!
